

# Timeslips Service Release

## Downloading

Click on Help from the Timeslips toolbar. Select "Timeslips on the Web"; select "Download Latest Update".

This will connect you to the Timeslips update area. It will automatically check to see if your workstation has the latest update installed.

You can download the service release as well as the service release notes. The upgrade is installed on your server. Each workstation gets updated as they log on.

If you need more help, call Compu-Aid, Inc. at 561-416-9288
